

SUSTAINABILITY POLICY

We are committed to sustainability and protecting the environment. As farmers we feel we are just custodians of the land and it is our responsibility to look after it.

SUPPORTING NATURE AND BIODIVERSITY

Our farm cottage and lodges are surrounded by wildlife which includes hares, hedgehogs, deer, squirrels, pheasants, foxes as well as our own rare breed sheep. Our guests are asked to follow the countryside code by following footpaths, closing gates and take-home litter. [Learn more.](#)

We have bird and bat boxes, a nature reserve which is home to a breeding pair of swans and lots of frogs, toads and newts. We have enclosed our lodges with dead hedges which provide a very important habitat for wildlife and have planted wild flower borders around many of our field margins which are a haven for butterflies, bees and hover flies. We avoid using pesticides and slug pellets.

We are members of the nature friendly farming network and embrace the RHS Planet friendly gardening campaign by planting trees, using peat free compost, reuse rain water to water the garden and we make our own compost. [Learn more.](#)

“We are currently grow around 80% of our own cut flowers for our guests. This can save up to 7.9kg carbon per bunch compared with those we were buying.”
Sarah

SAVING ENERGY

Our farm cottage has solar panels which feed into batteries which support most of the cottages electrical usage. Our lodges go one step further and are fully powered by a huge bank of solar panels which charge 3 heavy duty batteries and supply 100% of the cottages electrical needs. All electrical equipment has an energy rating of at least A. All the lighting is LED.

Our cottages are quiet and warm with the 100mm insulation in the walls and loft and double-glazed windows. The heating has thermostats and can also be controlled at each radiator.

RE-CYCLING AND UP-CYCLING

Our Farm cottage and lodges are fitted out with up-cycled furniture from local craftspeople where possible.

The cottages have recycling facilities for cans, glass, cardboard, plastic and paper. We purchase re-cycled products where possible. We encourage guests to think about the three R's
Reduce/Reuse/Recycle

GREEN COMMUNICATION

Where possible communication with guests is via email, phone or text to avoid using paper.

TRANSPORT

Information on local walks and cycle routes and information on local attractions are on display in our welcome hut on the farm. We provide secure storage for bicycles.

LOCAL ECONOMY

Supporting local businesses and producers supports our community. We have provided information in our welcome folders of local producers and farmers markets. Our welcome packs are made up of delicious locally made items including biscuits from The

Northumbrian Bakehouse , the organic milk is delivered in glass bottles by our local milkman and tea from Ringtons Tea. If we are unable to buy locally, we buy Fairtrade to ensure standards are met in the production and supply of those products.

We wash all our linen in house and air dry where possible.

CHEMICALS

Often cleaning products contain chemicals such chlorine and phosphates that can be harmful to the environment. We use ecover and splosh products which are paraben and SLS free. We also use their environmentally friendly cleaning products.
